Real World Concepts is a premier provider of life-saving medical training and emergency preparedness gear. We specialize in **Stop the Bleed**, **Tactical Combat Casualty Care (TCCC)**, and essential first aid education, equipping individuals, first responders, and organizations with the skills to handle critical medical emergencies.

In addition to expert-led training, we offer a range of high-quality **Individual First Aid Kits (IFAKs)** and **comprehensive First Aid Kits** designed for tactical, workplace, and everyday emergency situations. Our mission is to empower people with knowledge and tools to save lives when seconds count. Whether you're a civilian, law enforcement officer, or military personnel, Real World Concepts ensures you're prepared for the unexpected.

CLASSES WE TEACH

Real World Concepts was started to bring real world experience to training classes. RWC was created with the intent of providing clients with a “one stop shop” for all personal safety needs in mind. Several years ago National Association of EMTs and the American College of Surgeons developed the Stop the Bleed curriculum. Geoff was one of the first instructors to hold classes in multiple locations worldwide. Geoff has an extensive medical background from locations around the globe, providing both care and instruction to thousands of patients and students. The Stop the Bleed course has evolved to meet the goal of making Stop the Bleed as important as CPR and has become mandatory training in some locations. RWC can bring classes to your location, can accommodate classes from personalized individual classes to organizational size classes. RWC’s mission is to bring education to as many people as possible to empower students to care for themselves and loved ones before help can arrive. You are always the first responder, help may be on the way but seconds can seem like hours without the appropriate training.

“The fate of the wounded rests in the hands of the one who applies the first dressing”

-Nicholas Senn, MD Founder, Association of Military Surgeons of the United States

STOP THE BLEED[®]

About BleedingControl.org Today we live in a world where terrorism, the actions of unstable people, and the dangerous impulses of friends and relatives are very real and becoming increasingly more frequent. Massive bleeding from any cause, but particularly from an active shooter or explosive event where a response is delayed can result in death. Similar to how the general public learns and performs CPR, the public must learn proper bleeding control techniques, including how to use their hands, dressings, and tourniquets. Victims can quickly die from uncontrolled bleeding, within five to 10 minutes. However, anyone at the scene can act as an immediate responder and save lives if they know what to do. BleedingControl.org supports President Barack Obama's policy directive for national preparedness (Presidential Policy Directive 8), which targets preparedness as a shared responsibility of the government, the private and nonprofit sectors, and individual citizens. BleedingControl.org is an initiative of the American College of Surgeons and the Hartford Consensus and contains diagrams, news, videos, and other resources contributed by a variety of other private and nonprofit partners to help prepare you in the event you are witnessing one of these unspeakable events. Our shared goal is to provide you with a one-stop, online resource for credible information on bleeding control. We hope you will never need to use this information, but if you do, at least you will have the assurance that the information is credible and timely.

What to bring to class:

Note-taking materials - Your IFAK or Medical Kit -There will be medical supplies and kits for sale at class, can also build custom kits for your needs

Topics covered:

TQs - Wound Packing and Dressing - Chest Seals- Nasal Airways - "Get off the X" and the basics of triage - Difference between a First Aid Kit and an IFAK - Evaluate your current system

This is a good foundation class for the upcoming classes.

The class will run for approximately 2 hours

USCCA BASIC HANDGUN CLASSE

Course Outline 1. SELF-DEFENSE FIREARM BASICS: Universal safety rules | Clearing a semi-automatic | Clearing a revolver | Defining a gun's action | Understanding revolvers | Understanding semi-automatics | Modern, striker-fired handguns | Understanding magazines | Selecting a handgun | Pros, and cons of handgun choices | Ammunition components | Is caliber all that matters? | Other measurements | Ammunition care and storage | Common ammunition malfunctions | Clearing semi-auto malfunctions | other use of force options 2. Ammo · Included in class fees

The class meets the requirements for obtaining your Connecticut Pistol

The class will run approximately 8 hours

Modern sporting rifle Prep Class

Class designed to focus on new shooters prepping a new AR for class or other uses

Slings - Optics - Red dot vs LPVO - Lights - Accessories - Loctite-Paint pen

Body mechanics

Zero -What distance will be the primary use?

Gear set up

Chest rigs - Pouches -IFAK

Upgrades

Triggers -BCGs -Brakes vs flash hider and suppressors

Ammo · 100 rounds

The class will run for approximately 4 hours

AR / Other Prep Class

Class is designed to set up the new long-range shooter with the basics

Rifle and scope set up

DOPE

Data collection / Chrono

MAINTENANCE CLASS

Topics Covered

You bought that awesome new CT compliant OTHER and want to know how to tear it down and clean it? This is the class for you! You bought the rifle, and ammo, shot it and now you're hooked. But how should you really clean and maintain your new rifle so that it gives you generations of service? This class will give you the confidence to field strip your AR-15/OTHER firearms, properly clean, maintain and function check it for reliable operation for years of reliable service. The program will provide an in-depth understanding of all components, parts, and maintenance of the system. Each student will leave with an enhanced knowledge of the weapon platform, assembly, tear-down, and maintenance of the AR-15/OTHER firearms

Prerequisites

Basic understanding of the AR-15/OTHER firearm platform and the rules of safe firearms handling.

Course Outline

Overview of the AR-15/OTHER firearm · Understand the safety principles involved with AR-15/OTHER firearms · Proper nomenclature of each part · Identify all parts and assemblies of the AR-15/OTHER firearm · Understand the function of each part · Assemble & disassemble the complete upper receiver group · Assemble & disassemble the complete barrel assembly · Assemble & disassemble the complete lower receiver group · Identify & replace defective or broken parts · Obtain technical knowledge of gas system requirements & operation

Required Equipment

An open mind · Note-taking materials · AR-15 / Other Firearm · Full cleaning kit (Will be on hand at class for sale) · Small punch kit (I recommend this one: <https://www.brownells.com/gunsmith-tools-supplies/general-gunsmith-tools/punches/ar-15-armorer-s-punch-set-prod114383.aspx>) (Will be on hand at class for sale) · Small Hammer (Will be on hand at class for sale) Cleaning mat (Will be on hand at class for sale)

Ammo · No ammunition allowed in class

The class will run for approximately 8 hours
